Minutes

Morgan asked members to review the minutes from the April 4, 2018 meeting (May 30, 2018 meeting was a tour)

Scott – Motions to approve

Walter – Seconds the motion

April 4, 2018 CAP Meeting Minutes approved.

Morgan – Walter will now provide us with an operations update.

Walter – I want to explain the change of venue, the building we have been using has been condemned. Meetings going forward will be held off site until further notice.

Milton Quarry 2018 Operations Update

Walter presents an operations update to CAP members.

2018 Site Overview

- Overburden noise berm (west cell) has been completely removed
- In 2019 minimal blasting on the floor
- The east cell is the primary area where the removal of the overburden will be taken

Areas of Extraction

North Quarry

- All of the reserves in the walls have been extracted
- Taking rock from the floor

West Cell

- Extraction from the floor – January and February
- A few blasts left; should be completed by end of 2018

East Cell

- Majority of extraction took place this year
- Top and bottom bench has been taken

Production/Shipping

- Production shut down expected by the end of November
- 3.5 million tonnes this year – January 2018 to end of November 2018
- Shipping continues: 5:30am to 5:00pm Monday and Friday and Saturday based on customer demand

DFA in the Community

- Various earth day events
 - o Tree planting - April 28
 - o Creation of pollinator plots
- Well attended open doors/open house event - May 25
- Darling Home for Kids
 - o Trail repairs – September 26
 - o Pond repairs – August 23
- Supported Brookville school create an outdoor classroom, stone donation
- Sponsoring local minor league sports
- Send kids to camp with Town of Milton
- United Way Mayors golf tournament
- School tours for grade 4, 9 and university
- Grade 9 “Take your kids to work day”

Janice – When is everything going to be finished?

Walter – 6 to 8 years but depends on volume. Then a few years of clean up/ rehabilitation and taking down the structures. The license will be surrendered from the MNRF and then the land gets turned over to Conservation Hilton.

Matthew (Guest) – Which sections are you doing the most work in?

Walter – We are currently working mostly in the east cell.

Matthew – Do you know when we get major blasts if they are top bench or bottom bench?

Walter – I'd have to go back to the readings, but usually we don't notice a significant difference of blast readings between the top and bottom bench.

Matthew – Thanks for providing your readings, based on what I have seen, anything that is major in our house comes from the east bench?

Walter – We are doing more activity in this cell (east) as it was opened up only 3 years ago

Matthew – Are the blasts are getting closer to my house?

Walter – Your home is not directly across but yes they will be getting closer over time.

Matthew – What is that in terms of distance?

Walter – 300 meters closer to your home but still more than a kilometer away.

Matthew – So it won't be that different from what we are currently experiencing?

Walter – No, it should not significantly increase.

5 Side Road Metrolinx Update

- Relatively new Go Bus Terminal
- Concern raised by Metrolinx about the trucks idling; the trucks are blocking the Go Buses visibility and access to leave
- Security team in place that checks to make sure trucks are obeying town laws around parking, especially early in the morning.
- DFA has audited their own security team; continue to monitor
- Metrolinx is to call the police if they think safety is compromised

Morgan requests a motion to move in-camera for the CAP Member Review.

- Guest leaves the room
- Scott motions to enter in-camera review

In-camera review completed.

- Letty motions to exit in-camera review

Committee Discussion / Open Forum

Colin Best unable to attend; provided email update to CAP members re: James Snow Parkway extension.

- Construction has been delayed due to bankruptcy of the original contractor
- Negotiations are ongoing to get the original L.O.C. back to hire a new contractor, with the anticipated completion in the fall of 2019
 - o Steeles Ave to No. 3 side road, construction is underway, completion summer 2019
 - o Advance creek relocation for NW-2G-1 construction is anticipated to start spring 2019 and completed fall 202
 - o Tremaine road interchange at Hwy 401 construction anticipated to start 2021 and completed fall 2022

Action Item: Dufferin Construction to attend a CAP meeting and provide an update about the extension and road construction.

Matthew – How often do CAP meetings happen?

Walter – Typically three times a year, unless there is a big issue which we then make time to have an extra one.

Matthew – Is there a way for someone to join on a regular basis?

Walter – Yes, our terms of reference dictate composition of the CAP members. Important that a balance of stakeholders is maintained so one group isn't over represented. No current vacancies, but we do have an application package and we can keep your application on file. You are also welcome to attend as a guest until there is a vacancy and we can send you meeting updates.

Matthew – Informed members that the minutes haven't been updated on the website since 2016

Action Item – Working on uploading all of the recent minutes to the website.

Next meeting dates: March 6th, 2019, May 8th, 2019 and November 6th, 2018

Action Item – Ask Jessie to present on the ecological updates and rehabilitation plan in one of the upcoming meetings.

Nancy motions to adjourn meeting.
